

Use Redact-It™ to remove sensitive content from briefs, exhibits and more before sharing publicly with courts or with any other party needing restricted access to case information. Redact-It makes it easy to release both redacted and unredacted versions of the file. The original file is never altered in any way. And because Redact-It supports virtually any format, it doesn't require pre-conversion to a neutral format (like PDF).

## What is Secure CSF?

*Content Sealed Format (CSF) is our secure format that is ideal for sharing files while controlling who sees the information and what they can do with it. Similar to PDF, CSF is an accurate, encrypted rendition of the original file. There are no third party applications that can view, create or convert CSF files so the content stays secure. CSF also incorporates Visual Rights persistent file security, including:*

- File expiration date (relative and hard dates)
- Print, copy, and other feature restrictions
- Watermarks and print banners

## Visual Rights®

*Redact-It™  
for the Legal Industry*
